

Ajax Water Supply Plant Expansion

Notice of Class Environmental Assessment Addendum Study Commencement

Works Department

November 5, 2024

Public Notice

The Regional Municipality of Durham is conducting a Class Environmental Assessment Addendum (Class EA Addendum) for the Ajax Water Supply Plant (Ajax WSP) to find the best way to expand the existing water supply plant to handle future community growth.

A Class EA study was completed in 1991, indicating that an expansion to the Ajax WSP was required, and that the expansion could occur in the current location. The Class EA Addendum will follow the Class EA process as set out by the Ministry of the Environment, Conservation and Parks (MECP), based on the latest 2023 amendment. The Class EA Addendum will include the analysis of updated population and flow forecasts, identifying necessary upgrades and assessing impacts to technical, environmental, archaeological, social and financial aspects. The intention is to undertake the Class EA Addendum to meet current and future needs of the community.

This project will take several years with public consultation during the study. Information on any future consultation opportunities will be released as the study progresses. Public input is a key part of the Class EA process. We encourage you to review the information posted on the Region of Durham's website and provide your comments during the process.

Note: The outlined Study Area covers the area where existing studies were undertaken and where additional studies may be needed but does not reflect the extent to which the Ajax WSP will be expanded.

Further information and notices of upcoming events are available at durham.ca/AjaxWSPproject.
