Small Traffic Cabinet

Important Design Considerations:

- Precise alignment of the artwork at the wrap seams (cuts) and folds cannot be guaranteed. Artists are strongly encouraged to develop designs that do not rely on exact seam alignment.
- A small portion of the artwork will be obscured by the artist curatorial panel, as indicated in the template diagram.
- Traffic cabinets contain vents, handles, locks, and other functional components. The Region will determine wrap placement that best preserves the overall integrity of the artwork around these features.

Large Traffic Cabinet

Fold

Cut

Potentially Obstructed

Important Design Considerations:
